

**MALE ADAPTORS**  
 O-Ring seal short & long adaptors available in 15-50mm (1/2" to 2"). Manufactured from High Quality Glass Fibre Reinforced Nylon for a weather, termite, fungi & bacteria resistance.

All Hansen Rain Relief Valves are rigorously hand tested.

**POTABLE WATER APPROVED**

Materials approved for use with potable (drinking) water.  
**AS/NZS 4020**

**SLOW CLOSE ACTION**

The Rain Relief Valve internals have been designed with a built in delay in closing, this helps to minimise water hammer. Note the Rain Relief Valve arm may be in the closed position but the valve may take up to 8 seconds to fully close.  
**Do not force arm closed.**

**INLET**

**OUTLET**

**FULL FLOW**  
 1275 l/min at 12 Bar

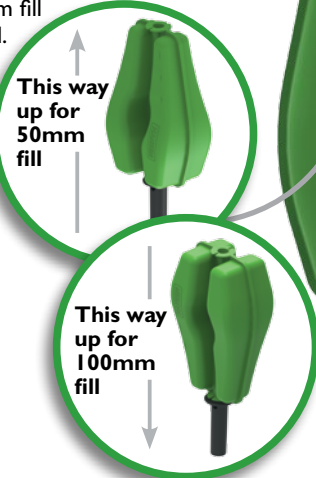

**RESTRICTED FLOW**  
 2 l/min at 12 Bar

**MAXIMUM WORKING PRESSURE**  
 12 Bar (174 psi)  
 @ 20°C

**WEIGHTED GREEN FLOAT WITH TWO FILL DEPTHS**  
 The float orientation determines either a 50mm fill or 100mm fill.

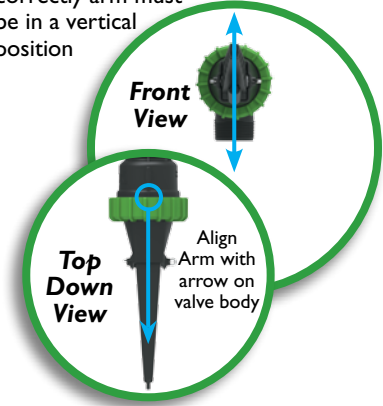

**LOW PARTS COUNT**  
 Less working parts results in a more efficiently operating valve for better overall performance. Less parts to remove, lose or break.

**ARM VERTICAL**

To ensure valve operates correctly arm must be in a vertical position

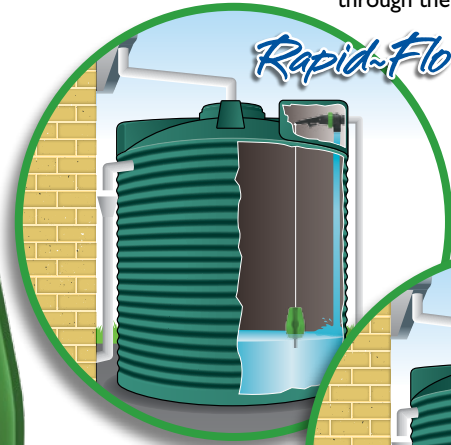

**LOCK OFF PLUNGER**

Rotating the plunger tab allows the valve to be manually locked to the off position

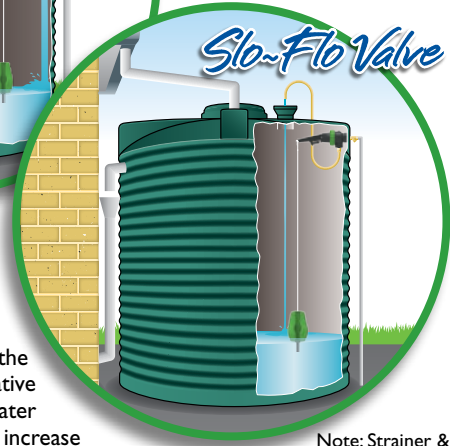

**SELF FLUSHING PILOT HOLE**

The Rain Relief Valve has been designed to ensure reliable operation at low and high pressures. Note: pressurised water will pass through the pilot hole when opening and closing. Water will stop passing through the pilot hole when fully closed.

*Rapid-Flo Valve*

*Slo-Flo Valve*

**ONLY PUMP WHEN YOU NEED TO**

If the tanks rain water level drops below minimum, the valve opens to supplement the tanks water from an alternative source such as the mains water supply. However it will only increase the water level by either 50 or 100mm.

Note: Strainer & Gooseneck are not included.
