

# Impact Sprinkler

## Features and Benefits:

- One sprinkler to do full or part-circle watering
- Made from long lasting metal components
- ½" male BSP inlet thread to suit most sled bases or threaded risers
- Thrust washer to reduce wear on components
- Adjustable deflector plate to change the spray height and to reduce throw radius
- Diffuser pin to change the water jet from heavy droplets to a fine spray
- Removable inlet section for cleaning and replacing washer

## Adjustments and Settings:

- Part Circle
- Full Circle
- Deflector Plate
- Diffuser Pin

## Adjustments:

- Part Circle:** Flick down wire clip on outside of metal arms  
Adjust metal arms to desired angle
- Full Circle:** Flick up wire clip  
Ensure sprinkler is rotating in a clockwise direction
- Deflector Plate:** Tilt the deflector plate to adjust the throw distance/height
- Diffuser Pin:** Screw the pin in to reduce the water droplet size and throw distance
